

**NUMBER NINE WIND FARM
MDEP NRPA/SITE LOCATION OF DEVELOPMENT COMBINED APPLICATION**

Section 22.
Odors

SECTION 22. ODORS

The clearing and construction phases of the Number Nine Wind Farm (Project) will not create significant odors. Only limited, short-term odors may be generated by exhaust from harvest/construction equipment.

Clearing will be performed utilizing standard forestry equipment under controlled conditions. If slash generated from clearing is burned, there may be wood smoke odors, and the appropriate notice to, and approval(s) from, the Maine Forest Service will be obtained.

There are no odors associated with operation of an Operations and Maintenance building, electrical collector line, electrical collector substation, or generator lead line.
